2 . Reason for the Revisions

The main reason behind the revisions to the forecast earnings above for the first half was stated in the “Notice on the Revisions to Performance Projections (Non-consolidated)” which was announced on October 24, 2006, and the effects of differences at respective segments between sales profit budgets and the revised forecasts are immaterial.

Refer to the following reference material regarding the contents of the revisions of the performance projections (non-consolidated).

(Reasons for the Revisions of the Non-consolidated Forecast Earnings)

(1) Forecast Earnings for the first half of the year ending March 31, 2007

According to the revised sales schedules of various pachinko/pachislot machines taking into account changes in the market environment and other factors, our new sales projection for pachislot machines increased over the initial projection made early in the fiscal term.

(2) Forecast Earnings for the full year ending March 31, 2007

Considerable changes are anticipated in the pachinko and pachislot machine markets in the second half of the year ending March 31, 2007.

We are now observing a clear trend of full-fledged replacement of old regulation machines with new regulation ones in the pachislot machine market and have already seen several hit products among the new regulation machines.

To cope with such changes in the environment, Fields Corporation has reviewed its sales plan for the second-half period, including the revision of its product lineup based on detailed marketing analysis.

Meanwhile, Fields Corporation intends to release a variety of additional pachinko machine models to meet diversifying market needs.

Fields Corporation hereby announces the “**Notice on the Revisions to Performance Projections (Consolidated)**” as the tabulation of consolidated business results has been completed following the “Notice on the Revisions to Performance Projections (Non-consolidated)” announced on October 24, 2006.

Note: The above projected earnings figures are based on information available to the Company’s management at the time of the release of this material. There are many uncertain factors inherent in forecasting, which may lead to actual results differing from forecast values.
